

Lymphoma Australia online support group agreement

- Lymphoma Australia's online support groups are for everyone, at all stages of their experience with lymphoma. This includes carers or support people.
 - Online groups will be limited to a maximum of 15 participants to enable equal opportunity for participants to share.
 - The group is a safe and confidential space with no judgement. Nothing discussed, is shared outside of the group.
 - Third parties will not be allowed to listen in to the meetings, nor will the sessions be recorded. No participant is allowed to record or take screenshots during the session.
 - All members of the group should have their camera's switched on for the entire session as this encourages interaction within the group.
 - Please be kind, courteous and respectful of each other during these sessions and remember everyone's journey is their own.
 - The group agrees to speak respectfully of any member of the lymphoma community including health professionals, health services and institutions.
 - All participants will be adequately dressed during the session and will not participate if intoxicated.
- This is safe and positive environment where participants should support and encourage each other to learn, connect, gather information and share experiences with each other and your Lymphoma Australia support nurse.
 - Lymphoma Australia takes no responsibility for external engagements outside of this event.
